Two of our important Stem partners are

Quenby Parker – Master Gardener

and

Bloomers Lawn & Garden

Competitions and Special Classes

At Dimon, we have an annual career day where students get to see what careers are available.

We have a fully functional engineering room and a robotics lab. Our students get fully engaged building robots!!

We are highly competitive at Dimon, on the left we are competing in a Robotics Competition and on the right is our First Lego League getting ready to compete.
