The STEM Academy at Bartlett provides an interdisciplinary approach to learning where all students enrolled apply concepts and skills from science, technology, engineering, and mathematics, infused with meaningful Arts integration, to solve real-world problems. This approach creates logical, perceptive, and independent thinkers who can apply these innovative, problem-solving skills to multiple aspects of their learning environment. Throughout the accelerated curriculum, students are exposed to potential careers in a wide variety of STEM-related fields, including multiple disciplines of engineering. The goal of the school is to become a model for America; a school that develops students into critical and innovative thinkers who are able to translate their acquired skills to the workplace. STEM Certified: 2015 and STEAM Certified: 2018
