

STEM/ STEAM Virtual Academy 2020, Keynote Presentation by Peter Ulrich

Please use the following links to access the keynote presentation.

In the live version our keynote speaker, Peter Ulrich, provided the following four recorded videos and live question and answer segments in between which focused on different topics presented in his keynote. This was an effort to model one way to consider virtual classroom instruction when using video and to help create an interactive keynote experience.

The video recording of this session did not capture the recorded video. The links below are listed in order and with detail to help recreate the keynote experience, if you choose.
